

# ClinicPro Hospice

## Point-of-Care Charting: Smart & Easy

ClinicPro is Horizon Healthware's tablet PC-based clinical documentation software. It provides easy to use handwritten or typed point-of-care data entry of hospice assessments and clinical notes onto computerized versions of familiar charting forms.

ClinicPro looks like the paper forms that nurses, therapists, social workers, chaplains, etc. are accustomed to, so "buy-in" is fast and training is simple. Best of all – forms can be completed by typing or writing per each user's preference. If used on a tablet PC, ClinicPro provides for handwritten completion of all clinical forms. If you can use a pen and the agency's normal stack of forms, you can use ClinicPro!

#### What's in ClinicPro?

- Nursing assessment/note
- Social Work assessment/note
- Spiritual Assessment
- Bereavement assessment/note
- Patient care plan
- Pain management
- Progress note
- Missed visit note
- Physician contact
- Inpatient stay note
- Aide Care Plan
- Case conference
- Chart review

#### Hospice + Home Health providers:

- OASIS forms
- PT/ST/OT/MSW assessment/visit note

*Learning curve from paper to computerized charting is practically non-existent! It's no more disruptive than replacing current paper forms with differently-formatted ones.*

Feedback from agencies who've implemented ClinicPro is overwhelmingly positive. Horizon's unique approach to point-of-care automation - creating an electronic chart with inkable forms that look like paper documents clinicians are accustomed to - is proving to be a huge hit. One agency director told us that the learning curve is near zero, as she got a new nurse staff member up and running with only a few minutes of general instruction on how to sign in to ClinicPro and find the patient's chart – after that, the documentation time savings was immediate.

Of their hospice's 1<sup>st</sup> JCAHO survey since implementing ClinicPro, an administrator & care coordinator said: "Just wanted to let you know how well our Joint Commission survey went – I don't believe it could have gone any better!", and... "Our survey last week was absolutely wonderful! The surveyor was very pleased and impressed with the software."

Write directly on the screen just as you would a paper form

Watch as your handwriting is recognized and converted to computer text

Have regular laptops you're not ready to replace?  
No problem – use ClinicPro in “type” mode and simply use the mouse and keyboard to point/click and type in the data fields.

Updated chart is available to the agency office in “real time” with internet/VPN access – or clinicians can synch-up later from home.

### Flexible deployment depending on your hardware budget and the availability of cellular coverage

Use the computers you already have in the office, clinicians still jot notes in the field but come in to create the electronic assessment, Aide care plan and visit note – OR –

Put laptops in the field with one, a few, or all clinicians, use laptops in “detached” mode and connect back to the office periodically to upload data – OR –

Use cellular cards in laptops so the data captured in the field is immediately stored to the main “server” computer in “real time”

Utilize Horizon’s web-based “Software as a Service” (SaaS) option if you don’t have an adequate server computer at your agency for the programs & data of ClinicPro

Call Regina at Horizon Healthware today to schedule a free demonstration.

Prepare to be impressed!

ClinicPro is fully integrated with PROMISE, our billing system, so information is entered once for data such as patient name and demographics, diagnosis, and insurance info, then shared across all forms. Field staff has access to the complete medical record, including historical notes and careplans, for every patient – not just their daily caseload.

Visit activity and supplies can be logged in ClinicPro by the clinician; data passes through for back-office verification, billing, and financial/productivity reporting.

Visit details flow seamlessly into claims to meet new UB04 hospice service itemization requirements.

Powerful Flexible Easy Unique	Clinic Pro
Familiar forms = fast adoption / short learning curve	
Write or type - your choice	
ALL patient charts on every mobile device	
Real-time or daily synch - your choice	
Web-based or on your own server - your choice
